

Task Manager V1 Commit Plan

Commit 1

Create project structure

Includes:

- Main.java
- Task.java
- TaskManager.java

Commit Message: Create project structure

Commit 2

Implement Task constructor

Includes:

- name field
- completed field
- constructor

Test: Create a Task and verify values

Commit Message: Add Task constructor and fields

Commit 3

Implement Task getters

Includes:

- getName()
- isCompleted()

Test: Verify correct values returned

Commit Message: Add Task getter methods

Commit 4

Implement Task state methods

Includes:

- markComplete()
- markIncomplete()

Test: Verify completion status changes

Commit Message: Add Task completion methods

Commit 5

Implement remaining Task methods

Includes:

- changeName()
- toString()

Test: Verify renaming and display format

Commit Message: Finish Task class

Commit 6

Implement TaskManager setup

Includes:

- tasks field
- constructor
- hasTasks()

Test: Verify empty and non-empty manager

Commit Message: Add TaskManager foundation

Commit 7

Implement addTask()

Includes:

- create Task
- add Task to list

Test: Add tasks successfully

Commit Message: Implement addTask feature

Commit 8

Implement getTaskByNumber()

Includes:

- task number conversion
- task retrieval

Test: Verify correct task returned

Commit Message: Implement task lookup helper

Commit 9

Implement completeTask()

Includes:

- task lookup
- markComplete call

Test: Verify task becomes complete

Commit Message: Implement complete task feature

Commit 10

Implement deleteTask()

Includes:

- task lookup
- removal from list

Test: Verify task is removed

Commit Message: Implement delete task feature

Commit 11

Implement getTaskList()

Includes:

- numbering
- task display generation

Test: Verify formatted task list output

Commit Message: Implement task list display

Commit 12

Implement Main foundation

Includes:

- Scanner
- TaskManager instance
- run()
- showMenu()

Test: Menu appears repeatedly

Commit Message: Implement main program loop

Commit 13

Implement input helper methods

Includes:

- getTaskName()
- getTaskNumber()

Test: Verify user input is returned

Commit Message: Add user input helpers

Commit 14

Implement Add Task menu option

Includes:

- handleChoice option 1

Test: User can add tasks

Commit Message: Connect add task menu option

Commit 15

Implement View Tasks menu option

Includes:

- handleChoice option 2

Test: User can view tasks

Commit Message: Connect view tasks menu option

Commit 16

Implement Complete Task menu option

Includes:

- handleChoice option 3

Test: User can complete tasks

Commit Message: Connect complete task menu option

Commit 17

Implement Delete Task menu option

Includes:

- handleChoice option 4

Test: User can delete tasks

Commit Message: Connect delete task menu option

Commit 18

Implement Exit option

Includes:

- handleChoice option 5

Test: Program exits correctly

Commit Message: Add exit functionality

Commit 19

Run full testing checklist

Includes:

- Task tests
- TaskManager tests
- Main tests

Fix discovered bugs

Commit Message: Complete testing and bug fixes

Commit 20

Refactor and cleanup

Includes:

- improve readability
- remove duplicate code
- clean formatting

Commit Message: Refactor Version 1

Commit 21

Version 1 Release

Project fully functional

Commit Message: Complete Task Manager Version 1
